# T 1000 BIO

- ❖ **T1000 Bio** is a combined access control and time and attendance system that offers functionality and affordable prices. With **T1000 Bio** the control of assistance and access are based on fingerprint verification, a unique characteristic of an individual. There is no possibility of fraud because **T1000 Bio** does not use passwords or cards; it operates only with fingerprint identification.

Guaranty of efficiency on access and time control, T1000 Bio is the perfect choice for small and medium size companies like offices, stores, factories and even on houses that need a high level of security. The affordable price and the easy way to install and operate make it your best option, with T1000 Bio the security that in the past were available only for large enterprises are now available also for small business.

T1000 Bio has a pleasant design with LCD display and optical fingerprint readers, the operation is stand-alone, in another words there is no need to have the unit connected into a PC.

Offices

Residences
